

## USER MANUAL

- The main screen has a search engine to search for the hotel you want to book, it also has a taskbar to perform other actions that I will explain later.

- When searching for the name of a hotel, if this hotel is in the database, the program will display some simple information about the hotel such as the image, the name, the price...

- If you press the button to book a room at the hotel, the program will take you to another screen where you can view the details of the hotel in more detail along with a more detailed description.

- When you press the reserve button, the program will take you to another screen where you can enter your information to reserve a room at the hotel.

The screenshot shows a mobile application interface for reserving a room. The title 'RESERVAR HABITACIÓN' is at the top. Below it, there are four sections for user input: 1. 'Introduce tu nombre:' with a text field containing 'Ismael'. 2. 'Introduce tu DNI:' with a text field containing '45124239X'. 3. 'Indica como nos has conocido:' with a dropdown menu showing 'Recomendacion'. 4. 'Introduce la clase:' with two radio buttons, 'ALTA' and 'BAJA', where 'BAJA' is selected. At the bottom, there is a black button with the word 'RESERVAR' in white capital letters.

- To delete a reservation you need to access the deletion screen that can be accessed from the main screen. To delete the reservation you need to enter the data correctly.

**BORRAR RESERVA**

Introduce tu DNI:

Introduce el id de la reserva:

**BORRAR**

- To modify a reservation, you must enter the requested data. You can access the reservation modification screen from the main screen.
